

Bradford Curling Club

August 8th, 2014

Vol. 4 - Issue 13

Hello, on this up in the air Labour Day weather day, good day to stay inside and get caught up on the paperwork.....Check the website for all the information on our Free Clinics starting October 4th, get in touch with those friends who would like to try the game and bring them to the club for some free instructions, and remember if they become a member the club still offers a \$ 25.00 finder's fee....Also the dates and times have been set for the Smart Serve sessions, only 10 spots per session, so let Bob Kelsey know if you want in on one of them, his contact info is on the website.....All members have been advised that bar duty can only be done if they have Smart Serve, this was made necessary to comply with insurance regulations.....The "Volunteer Days" housekeeping sessions have been set for Sept. 15th to 17th, we have many people who have volunteered to date but could still use a few more, let Wally Kemp, elk@sympatico.ca, know if you are able to help out.....We are very happy to pass along that we have recruited two new Directors for next season, Cathie Heppell will take over the Membership portfolio while Nick Miedema will step into the much needed and resurrected Facilities position. Both Nick and Cathie are now working on the tasks included in these positions and will become Directors officially at the AGM.....A few other changes within our Directors responsibilities; Russ Gale has added the Ice directorship to his Committee Liaison position, Mike Harding has added Pro Shop to Business, Sue Dubois will take over the bar and kitchen position while Brian Febel will combine Sales, Promotion and Publicity. These people have all now stepped into their areas of change, in a learning capacity, and they will become official with the AGM.....At the last Director's meeting it was decided that we would direct our finances to make improvements to the following areas of the club; paint the interior walls, point up joints in the outside walls, repair the front of the building soffit and fascia and the eaves troughs all around the building, replace the ramp at the front door and replace the arena lighting. Many of these items have been completed or started already. All will be done by Sept. 8th excepting the lights which will be done closer to the end of the month.....Remember the ice is scheduled to be ready for curling on October 4th, the day of the first clinic, the regular leagues are set to start on October 20th, with the Early Bird set to go the before that.....Until next time, if you have any ideas for Volunteer Days please pass them along to Wally Kemp, we have many things to do now but the owner of the house does always see what a visitor might see, let us know what you see.
